

MITIGATE RISKS IN UPLOADED FILES AND URLS

F-Secure Cloud Protection for Salesforce

OVERVIEW

Cloud ecosystems operate on a shared security responsibility model. Salesforce does a great job of covering various aspects of system and application level security. However, it is Salesforce subscribers' responsibility to secure files and links uploaded to Salesforce platforms by their customers and employees.

Together with Salesforce, we designed F-Secure Cloud Protection

to complement the native security capabilities of the Salesforce platforms. F-Secure Cloud Protection for Salesforce is designed to prevent attacks via files and URLs uploaded to Salesforce cloud.

It's an essential component of your overall security strategy, and thanks to its Cloud-to-Cloud architecture, requires no middleware.

Key benefits

PROTECT YOUR CLOUD

Protects your organization against attacks utilizing malicious files and URLs that users upload to Salesforce.

NO MIDDLEWARE NEEDED

Cloud-to-Cloud architecture means that no middleware is needed. Deployment via AppExchange takes only a few minutes.

NEXT-GENERATION SECURITY

With real-time threat intelligence, smart cloud sandboxing and more, we provide more than simple anti-virus ever will.

CREATED WITH SALESFORCE

The solution was created and designed together with Salesforce to ensure seamless integration.

ADVANCED ANALYTICS

Rich reporting, advanced security analytics, and full audit trails ensure efficient response to threats.

F-SECURE SECURITY CLOUD OVERVIEW

F-Secure Security Cloud is our cloud-based threat analysis and detection service. It utilizes real-time threat intelligence gathered 24/7 from tens of millions of security sensors across the globe. It forms the cornerstone of our award winning* and visionary products.

THREAT INTELLIGENCE CHECK

By leveraging real-time threat intelligence gathered from tens of millions of sensors, we can identify new and emerging threats within minutes of inception, ensuring exceptional security against constantly evolving threats.

MULTI-ENGINE ANTIVIRUS

When a file is unknown, the F-Secure Security Cloud subjects it to deeper analysis. Multiple complementary behavioral and heuristic antimalware engines search for malware, zero-day exploits and patterns of advanced threats and targeted attacks.

SMART CLOUD SANDBOX

Suspicious files are subjected to further analysis in Smart Cloud Sandbox, which runs suspect files in several virtual environments and monitors behavior to detect malicious activity.

*AV-Test & AV-Comparatives 2010-2019

ADMINISTRATION & SECURITY

Thanks to detailed reporting, comprehensive security analytics, and full audit trails, responding to threats is easy. This is helpful when responding to an attack taking place through Salesforce, or when investigating an attack coming from an unknown source.

Monitoring

Thanks to graphical reports and monitoring tools, IT administrators can easily supervise user activity and the security status of their Salesforce environment.

Alerts

Extensive security alerts and configurations can be used to automatically alert administrators in case of a security incident, ensuring fast response times.

Analytics

With powerful search functionality, event history and extensive analytics logs, IT Administrators can investigate and identify who, where, when and how an attack was carried out.

Administration

Solution administrators can configure security settings, alerts and actions in accordance with their company's security policies.
